Be sure to check weigh all bags off of the calciners and fill out the log sheet downstairs by the scale and attach "Packaged By" label with your initials.

#1 MED / Si-1624:

SI-1624- started making material again, 3 bags of rescreen taped off by red zone.

Midnight shift: Started making batches again.

Day shift:

Afternoon shift: holding

#1 RC / Si 1624:

Stopping lot 625 rescreens - after hopper is empty this afternoon, we are going to raise the temps and begin feeding the recently made material. Do not feed the remaining 3 bags in the middle of the floor (these are still Lot 625 but are to be held for now, they should have yellow tape around them). When feeding the regular material, get feed rate around 260-270 lbs/hr. The syntron "on" setting should be at around .8 to achieve this.

Midnight Shift: Began feeding new material. Coming out pink.

Day shift:

Afternoon shift:
